DESCRIPTION:

Come and escape the humdrum of daily routine with an extraordinary rafting experience in Croatia! This outing is so much more than a simple rafting excursion, it's a fun outing in which you can combine some of the best outdoor activities into one, such as rafting, cliff jumping, snorkeling and hiking (hill climbing).

This part of the Cetina River starts at an altitude of more than 100 meters and boasts many rapids and cliff diving points, making this adventure completely and unforgettable from anything else you'll experience in Omiš. You'll go rafting between Blato na Cetini and Zadvarje Village. The length of this section is 9.5 km long with rapids that are classed 2-3. The biggest rapid is a breath-taking 4 meters drop surrounded by cliffs, one of which is a 40-150 meters deep canyon.

Water sports fans can go snorkeling in crystal clear water and the more audacious can jump in the transparent water from cliffs that range between heights of 4-12 meters. The fun outing will come to an end with a hill climb, now that's what they call finishing on a high note!
